META ADS CASE STUDY

# MAKING INSURANCE EASIER TO ACT ON

A lead-generation campaign that simplified the offer and turned interest into measurable insurance enquiries.

# A technical service presented simply

Insurance is rarely an impulse decision. The campaign needed to explain the offer quickly, appear credible and make requesting more information feel straightforward rather than complicated.

## CAMPAIGN OBJECTIVE

**Generate quote and information requests through Meta lead ads.**

## MY ROLE

**Strategy, creative, copy, setup and ongoing optimization**

## The challenge

Insurance advertising can become too technical or too vague. Long explanations lose attention, while aggressive promises reduce trust. The campaign had to create enough clarity for the user to take the next step without overloading the ad.

## What I handled

**Campaign strategy and setup**

**Trust-focused creative design**

**Copy and headline development**

**Audience structure and testing**

**Instant Form setup**

**Cost-per-lead optimization**

# A practical campaign system

The campaign was built as a repeatable process rather than a single ad. Each stage had a clear job: attract attention, make the offer easy to understand, remove friction and improve efficiency.

01

## Simplify the offer

The message was reduced to the practical benefit and the next step, avoiding unnecessary industry language.

02

## Build trust visually

The creative direction was clean and professional so the service felt credible rather than promotional.

03

## Reduce form friction

The lead form asked for the details needed for follow-up without creating an unnecessarily long process.

04

## Improve efficiency

Creative and audience combinations were compared, allowing weaker performance to be reduced and stronger variations to remain active.

## Optimization loop

Decisions were based on lead volume, cost per lead and individual ad performance.

# The result

The campaign produced more than one hundred platform-reported insurance leads at a controlled average cost per lead.

## What made it work

**For insurance, clarity and credibility mattered more than heavy sales language. A simple offer gave users confidence to request a quote or more information.**

### TRANSPARENCY NOTE

Figures are taken from the supplied Meta Ads Manager campaign dashboard. They represent platform-reported leads and cost per lead. They do not independently verify sales, revenue, lead quality or final conversion after follow-up. Client-identifying information has been withheld for privacy.
