

GROWTH NEXUS
META ADS CASE STUDY

PROPERTY LEADS WITHOUT THE USUAL NOISE

A structured Meta lead-generation campaign that produced a strong volume of property enquiries at a controlled cost.

From property interest to a clear enquiry

This campaign was created for a real-estate offer that needed consistent enquiries from Facebook and Instagram. The job was not simply to generate clicks. It was to make the offer easy to understand and give interested prospects a simple next step.

CAMPAIGN OBJECTIVE

Generate a consistent flow of property enquiries through Meta Instant Forms.

MY ROLE

Strategy, creative, copy, setup and ongoing optimization

The challenge

Property advertising is crowded, and many ads look almost identical. A generic message can attract curiosity without producing useful enquiries. The campaign needed a clear offer, mobile-first creative and a lead process that did not feel like work.

What I handled

Campaign structure and setup

Creative direction and ad design

Primary text and headlines

Audience structure and testing

Lead-form setup

Performance monitoring and optimization

A practical campaign system

The campaign was built as a repeatable process rather than a single ad. Each stage had a clear job: attract attention, make the offer easy to understand, remove friction and improve efficiency.

01

Offer and message

The campaign focused on the property value points that mattered most, then translated them into short, direct ad copy.

02

Creative variations

Multiple visual and message angles were prepared so the campaign did not depend on one advertisement.

03

Lead journey

The form was kept simple for mobile users while still collecting the information needed for follow-up.

04

Ongoing decisions

Individual ads were reviewed against lead volume and cost. Weaker variations were refined or paused while stronger ones received more attention.

Optimization loop

Decisions were based on lead volume, cost per lead and individual ad performance.

The result

The campaign generated a strong volume of property enquiries while keeping the platform-reported cost per lead efficient.

What made it work

A clear property message, relevant creative and a low-friction enquiry process can outperform a complicated campaign built around too many claims.

TRANSPARENCY NOTE

Figures are taken from the supplied Meta Ads Manager campaign dashboard. They represent platform-reported leads and cost per lead. They do not independently verify sales, revenue, lead quality or final conversion after follow-up. Client-identifying information has been withheld for privacy.
